If you are one of the people listed above, call 405-656-2322, with your account #, to receive a \$25 credit on your account!

What would life be like without electric co-ops?

In the holiday movie classic, "It's a Wonderful Life" the lead character, George Bailey (played by Jimmy Stewart), wishes he had never been born due to financial troubles he is experiencing. Through the help of an Angel, he sees how many lives would have been negatively affected if he didn't exist. George comes to realize that, even with his problems, he has a wonderful life with great friends and family.

So what do you think life would be like if community leaders had not founded Caddo Electric or Kiwash Electric, our parent cooperatives, nearly 80 years ago?

Living in the U.S. in 2016, it is nearly impossible to imagine life without electricity. So many of our modern conveniences that improve the quality of our lives are dependent on electricity as the "fuel" to make them work. From the alarm clock that wakes us up, to the refrigerator that keeps our morning milk cold and fresh. From the HVAC unit that keeps us cool in the summer and warm in the winter, to the vacuum that lets us clean more efficiently and all those kitchen appliances that save us time and physical energy. Of course, so much of our entertainment, whether it comes from the TV, radio or computer, depends on the kilowatt-hours that your electric co-op provides. Just think, there would be no smartphones or cell phones if there were no electricity.

Businesses of all kinds rely on electricity to produce and sell the products we need. So, it is no wonder that many electric co-ops feel that, while our primary product is electricity, we are really in the quality of life business.

As we celebrate the season that reminds us to be thankful for all that we have, it is important to remember the 1.3 billion people in the world that still live without reliable electric service. That is equal to about four times the U.S. population!

Many of the things we take for granted living in the U.S. are much harder and more time consuming for people in developing countries around the world. We are proud members of the National Rural Electric Cooperative Association (NRECA) that is working through their affiliate, NRECA International, and the NRECA International Foundation to help bring power to people in developing countries like Haiti and Liberia. (http://www. nreca.coop/it-starts-with-power/)

We are thankful that our community ancestors right here had the vision and foresight to do for ourselves what needed to be done, gathering our friends and neighbors to form our electric co-op. As the electric business of the 21st century continues to evolve, you can count on CKenergy to meet all of your electric energy needs. More importantly, we are here to help improve the quality of your wonderful life.

How Electric Co-ops Energized Rural America 1844 Cooperative principles established in Rochdale, England. 1909 Country Life Commission recommends creation of electric cooperatives to power rural areas. President Franklin D. Roosevelt creates federal Rural Electrification Administration (REA) by executive order. 1936 2,000 miles of electric lines under construction by electric co-ops. 1937 53,000 total miles of co-op lines constructed. 1940 180,000 miles of rural lines built with another 80,000 under way. 1941 One million farms have power. 1942 National Rural Electric Cooperative Association (NRECA) formed to represent co-op interests nationally. 1949 Roughly 184,000 miles of rural line constructed this year alone. 1950 Willie Wiredhand, a mascot for & electric co-ops, debuts; named after the hired hand electricity gave to farmers. electricity gave to farmers. 1962 Electric co-ops serve 5 million Americans; NRECA joins U.S. Agency for International Development (USAID) to bring electricity to developing nations. 1969 Apollo 11 mission; 500 million people around the world tune in to watch astronaut Neil Armstrong walk on the Moon. REA renamed Rural Utilities Service. 1998 Touchstone Energy® Cooperatives debut, Touchmore Energy Cooperatives providing a co-op "brand ID" and marketing options. 2009 NRECA/USAID partnership connects more than 100 million people to electricity in 42 nations. 2010 75 years after creation of REA, 900-plus co-ops in 47 states serve 17 million homes and businesses. Don't Take the Merry Out of Your Christmas

Before your family puts up a tree or hangs the stockings this holiday season, start a new tradition. Put safety at the top of your list. Too often the twinkling lights people see are on top of a fire truck or ambulance—the result of holiday accidents that could have been prevented.

Trees and lights are danger-prone holiday decorations. According to the United States Fire Administration, Christmas trees start an average of 260 house fires each season, resulting in more than \$16 million in property damage. Another 150 house fires are sparked by holiday lights and decorative lighting, costing \$8.9 million in damage. Typically, all of these fires are more severe and damaging, resulting in twice the injuries and five times the fatalities per blaze compared to average winter home fires.

Unsafe practices while putting up decorations are to blame for even more injuries. Nearly 6,000 individuals visit emergency rooms each year for falls that occur. Four thousand more are treated for injuries associated with extension cords.

But safety steps don't end with bright decorations. Gifts trigger injuries, too. Toys that are not used as intended or used without proper supervision lead to avoidable accidents. Electrical shocks, burns, or injuries from sharp, pointed, or moving parts are to blame for many of these injuries according to the Consumer Product Safety Commission.

When it is time to deck your halls, take these precautions to ensure the safety of you, your family, and holiday guests:

TREES

Real or artificial, short or tall, Christmas trees are often the culprit for danger. Incorporate these safety guidelines in your decorating routine:

• Make sure an artificial tree is

labeled "fire resistant." Be aware that "fire resistant" does not mean "fire proof." Exercise caution when it comes to your tree.

- Make sure a live tree is fresh and green. Dry, brittle limbs and shedding needles are a breeding ground for sparks. Water a live tree regularly to prevent it from drying out.
- Place any type of tree away from heat sources such as fireplaces, vents, and radiators.

LIGHTS

Festive lights give homes a magical glow both inside and out. When decorating this season, a few simple safety tips can keep your spirits bright.

- Do not overload electrical outlets. Most lights are designed to connect no more than three strands. Inspect the wires periodically to make sure they are intact and not warm to the touch.
- Never leave lights on overnight or when no one is home.
- Only use lights that have been approved by an independent testing laboratory.
- · Replace any strands that show signs of damage, such as bare or frayed wires, broken bulbs, or loose connections. Faulty lights can send an electrical charge through a tree

and electrocute anyone who comes in contact with a branch.

GIFTS

The thrill of holiday presents is quickly forgotten when a gift leads to injury. Here are a few suggestions to keep children safe:

- · Select gifts that are age appropriate for the recipient. Toys recommended for older children pose too many risks for younger children to use safely.
- Educate children on electrical safety when using any new toy or product that requires an electrical connection.
- Review all instructions and safety guidelines included with new products before you allow the child to use it. This ensures the safety of the child and protects the integrity of the product.

Make sure safety ranks at the top of your "to do" list this holiday season. Like the old Christmas song says, there is no place like home for the holidays—especially when your family is safe and your home is filled with good cheer.

Payment Option can help offset increased seasonal usage

Cooler weather is upon us and that can mean increases in electricity usage as switches flip on home heating systems.

CKenergy Electric Cooperative members who want to avoid spikes that come from increased seasonal usage may want to consider having their monthly bills averaged.

Averaged bills are the perfect way to avoid being surprised by the peak usage that comes when more home heating is required.

The Average Monthly Payment Plan offered by the cooperative keeps a rolling average of a member's last 12 months of usage. That way, they'll pay a more predictable amount each month.

Members who participate in the program can still look at their bills and tell what they would have had to pay for that billing period. Meters are still read monthly for members who pay averaged bills.

Averaged billing simply keeps monthly bills within a similar range. That predictability is something from which the home owner on a budget can benefit.

Members can apply for the Average Monthly Payment Plan by calling the cooperative during normal business hours at 1-405-656-2322.

Statement of Non-Discrimination

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202)720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800)877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866)632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202)690-7442; or (3) email: program.intake@usda.gov. CKenergy is an equal opportunity provider and employer.

What's Cookin

INGREDIENTS

3 cups milk chocolate chips, divided ½ cup butter, cut into pieces

3 large eggs

1¼ cups all-purpose flour

1 cup granulated sugar

¼ teaspoon baking soda

1 teaspoon vanilla extract

1 cup chopped walnuts or pecans 20 Kraft caramels, unwrapped 1½ tablespoons milk

Chocolate Turtle Brownies

INSTRUCTIONS

Spray a 9 x 13 inch pan with non stick cooking spray and preheat oven to 350 degrees.

Melt 1½ cups chocolate chips and butter in a large bowl in the microwave in 30 second increments, stirring in between. Stir in eggs, then add in flour, sugar, baking soda and vanilla. Stir together well.

Spread batter into the greased pan, then sprinkle with chocolate chips and chopped nuts.

Bake for 30-35 minutes or until a toothpick inserted in the center comes out clean.

Microwave caramels and milk in a small bowl for about 1 minute. Stir and then continue to microwave, stirring every 15 seconds until all is melted and smooth. Drizzle over warm brownies.

Cool brownies before cutting and serving.
